Comments on teaching (strengths, areas for improvement)

Student 7263 - Advik is absolutely amazing! Especially at making the material more accessible to applied people. After a whole semester of 382 I still didn't know what GMM was, but Advik explained it in one recitation. I wish he was my metrics TA in first year. In general, having people who do applied work teach/TA metrics helps a lot, I think.

Student 41910 - Advik was an excellent TA. One of the best things about his teaching style were the examples he worked out for us. He was also very responsive and kind. Thank you, Advik!

Student 43021 - Advik may be the best TA at MIT. His office hours were tremendously useful. He spent hours walking me through the material and made it highly accessible. His recitations are incredible. He broke down the most complicated subjects into something even I could understand.

Student 43729 - Advik is a national treasure. He is one of the greatest TAs I've ever had. So energetic, so kind, so prepared! And very knowledged in metrics. :) I went into the department on Fridays just to watch his recitation, and then would go straight home. He was also very responsive to adapting recitations based on popular demand for subjects covered. Thank you for a great semester!

Student 43775 - Excellent communicator and teacher. Clearly cared about the teaching and learnt a lot from the TA sessions.

Student 46252 - Advik was fantastic! He managed to make the recitation sections very engaging, despite being during the Friday evening time slot. He was also very helpful in office hours and responsive via e-mail.

Student 46905 - Very thoughtful when answering questions, and recitations were helpful and interesting (a feat considering their timing).

Student 47003 - Advik was perhaps the best instructor I have had in my life. Remarkably clear, put lots of effort into recitations, and very engaging. I have nothing bad to say!
